Yejin Son

sonyejin@cs.ubc.ca | Homepage | Google Scholar

I am a Ph.D. student in Computer Science at the University of British Columbia and a Vector Institute affiliate. My research focuses on **Functional Theory of Mind** and **realistic user simulation**. I study how AI can use social reasoning to guide its actions and develop user simulations that capture the diversity of human behavior, with the goal of building AI that meaningfully supports human interaction and relationships.

Education

University of British Columbia Sep 2026 – Present
Ph.D. in Computer Science (Advisor: Prof. Vered Shwartz) | Vector Institute Affiliate

Yonsei University Sep 2023 – Aug 2026
M.S. in Artificial Intelligence (Advisor: Prof. Youngjae Yu) | *GPA: 4.20/4.30*

Yonsei University Mar 2021 – Aug 2023
B.A. in Economics and Applied Statistics | *GPA: 4.04/4.30*

Research & Teaching Experience

Visiting Graduate Researcher — Vector Institute & University of Toronto Jan 2026 – Jul 2026
Advisor: Prof. Zhijing Jin

- Investigated latent cultural decision boundaries in LLMs through persona-projection divergence, resulting in a first-authored paper at the ICML 2026 Workshop on Pluralistic Alignment.

Research Assistant — MIR Lab, Yonsei University Mar 2023 – Aug 2026
Advisor: Prof. Youngjae Yu

- Led and co-led research on multimodal reasoning, LLM safety, and alignment, resulting in first- and co-first-author papers at ACL and EMNLP and a publication at COLM.

Teaching Assistant — Multimodal Deep Learning (graduate), Yonsei University Spring 2024

Awards & Honors

Four Year Doctoral Fellowship (4YF), University of British Columbia (stipend & tuition award) 2026
AI Convergence Education Program Visiting Scholarship, IITP (approx. US$37K; one of 25 awardees nationwide) 2025–2026
AI Seoul Tech Graduate Scholarship, Seoul Scholarship Foundation (approx. US$3.4K) 2025
Y2Y Merit Scholarship, Yonsei University (approx. US$8.7K) 2023–2024

Academic Service

Program Committee: Trustworthy AI for Good Workshops at ICML 2026 and NeurIPS 2026
Reviewer: NeurIPS 2026 | ACL 2026 Demo Track | ICML 2026 Workshop on Pluralistic Alignment | EACL 2026 Student Research Workshop | NAACL 2025 Student Research Workshop

Technical Skills & Languages

Programming & Tools: Python, PyTorch, TensorFlow, NumPy, LangChain, LangGraph, R, MySQL, Git
Languages: Korean (Native), English (Fluent)
